MORNING BOX

Your Personal Breakfast Assistant

MB-PRO-001

Production & Food Specification

Version 1.0 | FINAL / LOCKED

Morning Box Product Standard

Document Purpose

This standard defines the approved Morning Box MVP food components, portion logic, production outcomes, breakfast assembly rules, swap equivalency, add-on specifications, ingredient/allergen records, packaging principles and final product quality checks.

Standardize the outcome, not every movement in the kitchen.

Size changes quantity, not composition.

1. Production Specification Architecture

Every Core item is governed by a Product Specification Card containing:

Field	Requirement
Item	Approved product/component name
Category	Morning Box component category
Approved Ingredients	Ingredients/variants permitted under the standard
Standard Portion	Approved Light / Regular / Large portion where applicable
Preparation Standard	Required production outcome
Final Presentation	Required serving/presentation form
Packaging Requirement	Product-level packaging/separation requirement
Dietary Compatibility	Eligibility by dietary requirements
Allergen Information	Verified allergen record
Swap Group	Approved functional equivalency group, if applicable
Quality Check	Final product-specific QC requirement

- Product, Production and Portion standards are defined at component level first, then used to build Breakfast Models.
- Regular is the reference size unless a specific product rule states otherwise.

2. Portion & Measurement System

- Use the measurement unit appropriate to the product: piece, egg count, grams or loaf unit.
- Regular is the reference breakfast size.
- Light < Regular < Large, but there is no universal scaling ratio.
- Use target portions and acceptable ranges where product variability makes a range more practical.

Measure precisely where precision matters. Keep production simple where exact measurement adds no value.

3. Egg & Hot Savory Specifications

Item	Approved standard	Light	Regular	Large
Scrambled Eggs	Eggs + small cooking fat + light seasoning; no milk/cream required; soft, moist, fully cooked	1 egg	2 eggs	3 eggs
Plain Omelette	Plain; no variants	1 egg	2 eggs	3 eggs
Hard-boiled Eggs	Peeled and halved	1 egg	2 eggs	3 eggs
Breakfast Beans	White beans + light tomato sauce + seasoning	80 g	120 g	160 g
Halal Chicken Breakfast Sausage	Flexible-only; approx. 35-45 g per unit	1 pc	2 pcs	3 pcs
Halal Beef Bacon	Flexible-only; cooked weight	25 g	40 g	60 g
Halal Turkey Bacon	Flexible-only; cooked	25 g	40 g	60 g

	weight			

4. Bread Specifications

All Morning Box bread must be fresh, baked in-house by the Partner Bakery and served untoasted by default.

Bread	Light	Regular	Large
White Sourdough	40 g	60 g	80 g
Whole Wheat Sourdough	40 g	60 g	80 g
Multigrain Bread	40 g	60 g	80 g
Ciabatta	40 g	60 g	80 g
Focaccia (Plain or Olive approved variants)	40 g	60 g	80 g

5. Pastry Specifications

Pastry remains one piece regardless of Light, Regular or Large breakfast size. All pastries are fresh and baked in-house.

Pastry	Approved piece weight
Plain Croissant	55-70 g
Cheese Croissant	65-80 g
Pain au Chocolat	60-75 g
Fruit Danish	70-90 g; approved variants: Apple, Berry, Apricot

6. Fresh Savory Specifications

Item	Light	Regular	Large	Presentation
Avocado	40 g	60 g	80 g	Sliced or chunked
Tomato	50 g	75 g	100 g	Fresh
Cucumber	50 g	75 g	100 g	Fresh
Mixed Greens	20 g	30 g	40 g	Fresh
Olives	20 g	30 g	40 g	Pitted Green only

7. Fruit Specifications

Item	Light	Regular	Large	Approved standard
Seasonal Fruit Mix	100 g	150 g	200 g	Minimum 3 fruits from Melon, Watermelon, Pineapple, Grapes, Orange, Apple, Kiwi
Berries	50 g	75 g	100 g	Strawberry, Blueberry, Raspberry
Banana	Small	Medium	Large	Whole and unpeeled

8. Dairy & Cheese Specifications

Item	Light	Regular	Large	Standard
Greek Yogurt	100 g	150 g	200 g	Plain, unsweetened
Labneh	50 g	75 g	100 g	Plain
Feta	30 g	45 g	60 g	Plain

9. Grains & Bowls Specifications

Item	Light	Regular	Large	Standard
Overnight Oats	150 g	200 g	250 g	Rolled oats + approved dairy/plant milk base; no added sugar by default
Granola	30 g	45 g	60 g	Bakery-made or sourced; pack separately from wet components
Muesli	30 g	45 g	60 g	No added sugar/syrup; pack separately from wet components

10. Spreads & Accompaniments

Item	Light	Regular	Large	Approved standard
Cream Cheese	20 g	30 g	40 g	Plain; separate
Butter	10 g	15 g	20 g	Plain Unsalted; separate
Honey	10 g	15 g	20 g	Pure Honey; no added sugar/syrup/flavouring; vegetarian yes, vegan no; separate
Jam	10 g	15 g	20 g	Approved Strawberry / Apricot / Mixed Berry; separate
Peanut Butter	15 g	25 g	35 g	Smooth, Morning Box-approved; separate; strict allergy/cross-contact control

11. Swap Groups & Component Equivalency

Every swappable component has a Swap action. Components without a meaningful equivalent do not display a Swap action.

Swap Groups represent functional breakfast roles - not exact nutritional equivalence.

A swap preserves the role of the component, not exact weight/nutrition.

Swap Group	Approved alternatives / rule
Egg / Hot Main	Scrambled Eggs / Plain Omelette / Boiled Eggs / Breakfast Beans
Savory Protein	Chicken Sausage / Beef Bacon / Turkey Bacon; Flexible-only
Bread	White Sourdough / Whole Wheat Sourdough / Multigrain / Ciabatta / Focaccia
Pastry	Plain Croissant / Cheese Croissant / Pain au Chocolat / Fruit Danish
Fresh Vegetable	Tomato / Cucumber / Mixed Greens
Fruit	Seasonal Fruit Mix / Berries / Banana
Savory Dairy	Labneh / Feta
Dry Grain	Granola / Muesli
Savory/Neutral Spread	Cream Cheese / Butter
Sweet Spread	Honey / Jam / Peanut Butter
No Direct Swap	Avocado / Olives / Greek Yogurt / Overnight Oats

- Each swapped item uses its own approved portion standard.
- Same Swap Group = no price change.
- Pipeline: Recommended Component -> Swap Group -> Safety & Eligibility Filter -> Available Alternative -> Alternative's own portion.
- Combination Compatibility Filter must prevent unsuitable combinations (for example, mechanically applying a sweet-spread swap where the resulting breakfast combination is not appropriate).

12. Breakfast Assembly - 32 Base Recommendations

The four Breakfast Preferences are Savory Breakfast, Bread & Pastry, Fresh & Wholesome and Sweet Breakfast. The 32 combinations below are backend Base Recommendations, not 32 menu items. All compositions are defined at Regular size.

12.1 Savory Breakfast

Eating Style / Context	Regular Base Recommendation
Health-Conscious / Regular Workday	Scrambled Eggs 2; Whole Wheat Sourdough 60 g; Avocado 60 g; Tomato 75 g
Flexible / Regular Workday	Scrambled Eggs 2; Chicken Sausage 2 pcs; White Sourdough 60 g; Tomato 75 g
Health-Conscious / Active Morning	Scrambled Eggs 2; Whole Wheat Sourdough 60 g; Avocado 60 g; Greek Yogurt 150 g; Seasonal Fruit Mix 150 g
Flexible / Active Morning	Scrambled Eggs 2; Chicken Sausage 2 pcs; White Sourdough 60 g; Avocado 60 g; Seasonal Fruit Mix 150 g
Health-Conscious / Busy & On the Go	Whole Wheat Sourdough 60 g; Scrambled Eggs 2; Avocado 60 g; Mixed Greens 30 g. Ready-to-eat sandwich.
Flexible / Busy & On the Go	Ciabatta 60 g; Scrambled Eggs 2; Chicken Sausage 2 pcs; Tomato 75 g. Ready-to-eat sandwich.
Health-Conscious / Relaxed Morning	Plain Omelette 2 eggs; Whole Wheat Sourdough 60 g; Avocado 60 g; Mixed Greens 30 g; Berries 75 g
Flexible / Relaxed Morning	Plain Omelette 2 eggs; Beef Bacon 40 g; Focaccia 60 g; Feta 45 g; Tomato 75 g

- Regular Savory normally uses four core components; a fifth is used only when context justifies it.
- Busy swap alternatives must be compatible with the ready-to-eat format; e.g. Beans are not shown as a sandwich swap.
- Labneh remains in the Core Library but is not forced into Savory base models.

12.2 Bread & Pastry

Standard pastries are not used as the default recommendation for Health-Conscious users. Health-Conscious is a recommendation direction, not a dietary prohibition.

Eating Style / Context	Regular Base Recommendation
Health-Conscious / Regular Workday	Whole Wheat Sourdough 60 g; Unsalted Butter 15 g; Pure Honey 15 g; Seasonal Fruit Mix 150 g
Flexible / Regular Workday	Plain Croissant 1; White Sourdough 60 g; Butter 15 g; Jam 15 g
Health-Conscious / Active Morning	Whole Wheat Sourdough 60 g; Peanut Butter 25 g; Greek Yogurt 150 g; Banana Medium; Honey 15 g
Flexible / Active Morning	Plain Croissant 1; White Sourdough 60 g; Peanut Butter 25 g; Banana Medium; Greek Yogurt 150 g
Health-Conscious / Busy & On the Go	Whole Wheat Sourdough 60 g; Peanut Butter 25 g; Banana Medium. PB sandwich + whole banana.
Flexible / Busy & On the Go	Cheese Croissant 1; Banana Medium. Ready-to-eat, no assembly/cutlery.
Health-Conscious / Relaxed Morning	Whole Wheat Sourdough 60 g; Butter 15 g; Honey 15 g; Berries

	75 g; Banana Medium
Flexible / Relaxed Morning	Plain Croissant 1; White Sourdough 60 g; Butter 15 g; Jam 15 g; Seasonal Fruit Mix 150 g

- Honey <-> Jam is a natural sweet-spread swap where compatible. The Combination Compatibility Filter prevents unsuitable resulting combinations.

12.3 Fresh & Wholesome

Eating Style / Context	Regular Base Recommendation
Health-Conscious / Regular Workday	Greek Yogurt 150 g; Granola 45 g; Seasonal Fruit Mix 150 g; Berries 75 g. Granola separate.
Flexible / Regular Workday	Overnight Oats 200 g; Granola 45 g; Banana Medium; Honey 15 g
Health-Conscious / Active Morning	Overnight Oats 200 g; Greek Yogurt 150 g; Granola 45 g; Banana Medium; Berries 75 g
Flexible / Active Morning	Overnight Oats 200 g; Greek Yogurt 150 g; Muesli 45 g; Seasonal Fruit Mix 150 g; Honey 15 g
Health-Conscious / Busy & On the Go	Greek Yogurt 150 g; Granola 45 g; Banana Medium. Yogurt + granola cup + whole banana; granola separate until eating.
Flexible / Busy & On the Go	Overnight Oats 200 g; Banana Medium; Honey 15 g. Ready-to-eat oats cup + banana; honey separate.
Health-Conscious / Relaxed Morning	Greek Yogurt 150 g; Muesli 45 g; Seasonal Fruit Mix 150 g; Berries 75 g; Honey 15 g
Flexible / Relaxed Morning	Overnight Oats 200 g; Greek Yogurt 150 g; Granola 45 g; Seasonal Fruit Mix 150 g; Banana Medium

12.4 Sweet Breakfast

Eating Style / Context	Regular Base Recommendation
Health-Conscious / Regular Workday	Whole Wheat Sourdough 60 g; Peanut Butter 25 g; Banana Medium; Honey 15 g
Flexible / Regular Workday	Pain au Chocolat 1; Greek Yogurt 150 g; Seasonal Fruit Mix 150 g; Berries 75 g
Health-Conscious / Active Morning	Overnight Oats 200 g; Peanut Butter 25 g; Banana Medium; Berries 75 g; Honey 15 g
Flexible / Active Morning	Pain au Chocolat 1; Greek Yogurt 150 g; Granola 45 g; Banana Medium; Berries 75 g
Health-Conscious / Busy & On the Go	Whole Wheat Sourdough 60 g; Peanut Butter 25 g; Banana Medium. PB & Banana Sandwich; no added sweetener.
Flexible / Busy & On the Go	Pain au Chocolat 1; Banana Medium. Ready-to-eat.
Health-Conscious / Relaxed Morning	Whole Wheat Sourdough 60 g; Peanut Butter 25 g; Greek Yogurt 150 g; Berries 75 g; Honey 15 g
Flexible / Relaxed Morning	Fruit Danish 1; White Sourdough 60 g; Butter 15 g; Jam 15 g; Seasonal Fruit Mix 150 g

13. Breakfast Assembly Consistency Review

13.1 Busy & On-the-Go Size Exception

The main rule remains: Size changes quantity, not composition. However, a very simple Busy breakfast for which Light / Regular / Large would not create a meaningful difference may be offered in one Standard Size only. In that case, no Size Selector is shown.

Morning Box may offer the breakfast in one Standard Size only.

13.2 Multiple Breakfast Preferences

Multiple preferences expand the user's recommendation pool; they do not combine multiple breakfast categories into one box.

For example, selecting Savory Breakfast + Fresh & Wholesome does not create a hybrid breakfast. One eligible base recommendation can become Your Morning Box and another can become Another Option for You.

13.3 Dietary Requirements & Base Recommendations

Safety Filter -> Eligible Base Recommendations -> Dietary Compatibility -> Approved Component Substitution -> Final Recommendation

- Do not create 32 x dietary variants.
- If an approved substitute does not exist in the Morning Box Library, select another eligible Base Recommendation.
- Never invent a substitute from the Partner Bakery's full menu.

13.4 Another Option for You

Your Morning Box = Best Eligible Match

Another Option for You = Meaningfully Different Eligible Match

- The alternative comes from the same approved pool of 32 Base Recommendations.
- It must never bypass Eating Style, Dietary Requirements, Allergies or Daily Context.

13.5 Size Derivation

Every Base Recommendation is defined in Regular Size first. Light and Large are derived from approved component-level portion standards.

- No separate Light or Large recipes are created.
- The Busy & On-the-Go Standard Size exception in Section 13.1 remains applicable.

13.6 Recommendation Logic Summary

Safety -> Eating Style -> Daily Context -> Breakfast Preference -> Dietary Compatibility -> Eligible Base Recommendation -> Your Morning Box / Another Option

When multiple Breakfast Preferences are selected, they expand the eligible recommendation pool according to Section 13.2.

14. Add-on Production Specifications

MVP Add-ons are limited to two groups only: Bread Add-ons and Pastry Add-ons. Fruit, eggs, yogurt, cheese, spreads and other Core components are not standalone Add-ons in the MVP.

14.1 Bread Add-ons

Approved Bread Add-ons	Selection
White Sourdough	Half Loaf / Whole Loaf -> Quantity
Whole Wheat Sourdough	Half Loaf / Whole Loaf -> Quantity
Multigrain Bread	Half Loaf / Whole Loaf -> Quantity
Ciabatta	Half Loaf / Whole Loaf -> Quantity
Focaccia	Half Loaf / Whole Loaf -> Quantity

Whole Loaf = One complete Morning Box-approved bakery loaf/unit.

Half Loaf = Approximately 50% of the approved Whole Loaf by weight.

- Each Partner Bakery must have a Morning Box-approved standard loaf size for each bread it supplies.

- The bakery must maintain that approved loaf standard consistently; loaf size must not vary widely day to day.
- Bread Add-ons are fresh, baked in-house and packaged separately from breakfast components.
- Packaging must protect bread from crushing and moisture.
- Quantity can be Half Loaf x 1, 2, 3... or Whole Loaf x 1, 2, 3....
- Add-on pricing is independent of Breakfast Size.

Bread Add-ons use each Partner Bakery's Morning Box-approved standard loaf size. A Half Loaf is approximately 50% of the approved Whole Loaf by weight. Bread Add-ons are fresh, baked in-house and packaged separately from the breakfast.

14.2 Pastry Add-ons

Pastry Add-on	Approved piece specification
Plain Croissant	55-70 g
Cheese Croissant	65-80 g
Pain au Chocolat	60-75 g
Fruit Danish	70-90 g; Apple / Berry / Apricot approved variants

Pastry Add-on = Product x Quantity.

- Pastry Add-ons are sold by piece and quantity.
- They use the same approved product and weight specifications as the Core Pastry Library.
- Light / Regular / Large sizing does not apply.
- Pastries must be packaged separately or in a protected section so Hot/Wet components do not soften or crush them.
- For Fruit Danish, the customer may select only approved variants available from the allocated Partner Bakery.

Pastry Add-ons are sold by piece and quantity, using the same approved product and weight specifications as the Core Pastry Library. Add-on pastries do not use Light, Regular or Large sizing.

15. Final Production Specification Review

15.1 Ingredient & Allergen Record

Every approved Morning Box product must have a verified record sufficient for standardization, dietary eligibility and customer safety. Morning Box does not require a Partner Bakery to disclose unnecessary confidential recipe detail.

Required record	Purpose
Product Name	Identify the approved product
Ingredients	Determine eligibility and relevant composition
Allergens	Safety and exclusion filtering
Dietary Compatibility	Determine eligible users/recommendations
Approved Variants (if any)	Control permitted product variants

Every approved Morning Box product must have a verified ingredient and allergen record sufficient to determine product eligibility and customer safety.

No product may enter the Morning Box recommendation, swap or add-on system without an approved ingredient and allergen record.

15.2 Packaging & Component Separation

- Dry/crisp components such as Granola and Muesli must not be pre-mixed with wet components when separation protects texture.
- Bread and Pastry must be protected from Hot/Wet components where needed to prevent softening or damage.
- Spreads are separately portioned and packaged unless an approved Breakfast Specification explicitly defines a ready-to-eat assembled format.

- Hot and Cold components are separated where needed to preserve quality and safety.
- Components may be pre-assembled when the approved Breakfast Specification defines a ready-to-eat format, such as an approved sandwich.

Separate components when separation protects freshness, texture, safety or usability. Pre-assemble only when the approved Breakfast Specification specifically requires a ready-to-eat format.

15.3 Final Product Quality Check

Correct Product -> Correct Portion -> Correct Swap -> Dietary/Allergy Compliance -> Freshness & Appearance -> Correct Packaging

- The bakery verifies the correct product and confirmed order.
- The approved portion/size is used.
- Confirmed swaps are executed exactly.
- No component incompatible with the customer's dietary/allergy requirements enters the box.
- Freshness and appearance are acceptable.
- Components are separated or assembled according to the approved Packaging / Breakfast Specification.
- For Business Breakfast, the same QC applies to each Breakfast Model x Size x Special Breakfast designation.

A Morning Box may only be marked Ready after the final assembled breakfast matches the approved product specification and the confirmed customer order.

15.4 Food Safety Parameters

MB-PRO-001 defines the product standard but does not invent numerical food-safety operating limits. Specific holding temperatures, maximum holding times, cooling/storage requirements and cross-contact procedures are governed by applicable food-safety requirements and Morning Box Partner Bakery safety procedures.

MB-PRO-001 defines what the product must be. Food-safety operating parameters are governed by applicable food-safety requirements and Morning Box Partner Bakery safety procedures.

If required, detailed operational food-safety parameters may be maintained separately in a dedicated Morning Box Food Safety & Handling Standard (e.g. MB-FDS-001) based on the applicable official requirements.

Final Status

MB-PRO-001 - Production & Food Specification - Version 1.0

FINAL / LOCKED

This document consolidates the finalized Morning Box MVP production and food specification decisions through Sections 1-15.
